

PRESS RELEASE – Forest Operations Engineering LLC launches new website!

Mechanized Forest and Fire Operations

<http://ForestOperationsMT.com>

Visit us online for insightful, helpful information and examples of using forestry machines for wildfire, fuels reduction and timber operations. We focus on technical details of mechanized field operations that benefit land managers, incident decision-makers, machine contractors, and curious readers. Our team offers more than 100 years of combined professional fire and forestry expertise, and collaborates with the likes of [Jocko Consulting](#) and [Incident Resources Inc.](#)

Learn about mechanized task forces, designed-in equipment safety, machine capabilities and more. You will find shared tips, techniques, best practices, transport solutions, accident prevention measures, and forest industry events. When you need expert subject trainers and presentations, check out our consulting and field services.

Upcoming showcase of articles: *Diary of a Lone Operator ...Women Drivers ...Turnarounds and Hindsights ...HE Tactics 101 ...That's Your Strategy? ...Hazard Tree Taps ...Call For A Steel Cab ...Canadian Firefighter, Eh? ...HE Academy Graduates ...International Radio Communications.*

Please join us online. Share our new website with friends, family, and colleagues.
Let us know if you would like to receive our occasional emails.

We welcome your comments, lessons learned, field operation reviews, photos, and videos where strong iron work is being done to protect our natural and community resources.

Mechanized Forest and Fire Operations is online at ForestOperationsMT.com.

Keep out of the bight, and stay in touch!
